MANOJ HT

PROFESSIONAL EXPERIENCE

Frontend Engineer

Aug 2024 – Present

Razorpay (Collabera Digital)

Onsite - Bengaluru, Karnataka, India

- Developed and optimized the frontend application, ensuring **scalability and responsiveness**.
- Implemented **100% Blade component design**, enhancing UI consistency and maintainability.
- Rectified **performance bottlenecks**, improving app speed and user experience.
- Led a **team of two developers**, mentoring them in best coding practices.
- **Tech Stack:** React, React Query, Zustand, Axios, Blade

Software Engineer

Nov 2022 – March 2024

Onnet systems India

Onsite - Bengaluru, Karnataka, India

- Designed, developed, and maintained **enterprise-scale web applications** in **React & Angular**.
- Solved **critical caching issues**, preventing crashes and optimizing data retrieval.
- Spearheaded the **development of a large-scale project from scratch in just 9 days**.
- Implemented **Micro Frontend Architecture**, enhancing modularity and team collaboration.
- Built an **internal component library (React & Angular)**, reducing UI development time by **30%**.
- Improved **app performance by 40%**, optimizing load times and frontend efficiency.
- Mentored **interns and junior developers**, acting as a **reporting manager**.
- Collaborated with **stakeholders** in frequent meetings to enhance product direction.
- **Tech Stack:** Angular, React, Redux, Node.js, GitLab, SCSS, LESS, HTML, CSS, JavaScript, Axios

Trainee Engineer

Nov 2020 – Nov 2021

Hydrolines India

Onsite - Bengaluru, Karnataka, India

- Conducted **quality inspections** and crimping of hydraulic components.
- Ensured compliance with manufacturing specifications through manual labor and teamwork.

PRODUCTS

Financial Risk Management (Yes Bank)

- **Description:** A **fraud detection and rule-based security system** for banking transactions.
- **Contributions:**
 - Implemented **Rule Management, List Management, and Async Report Generation**.
 - Built an intuitive UI using **Blade components** and **Styled Components**.
 - Optimized API interactions with **React Query**, improving **data fetching** and **fraud detection**.
- **Tech Stack:** React, Zustand, GitHub, Blade

IPTV System

- **Description:** A complete IPTV solution for **managing subscriber services, content security, and transmission**.

- **Contributions:**
 - Maintained **SMS, CAS, and MUX Scrambler**
 - Built **DRM Management** and **Version 2** from scratch
 - Implemented best coding practices.
- **Impact:**
 - Improved **SMS module efficiency by 20%**.
 - Enhanced **UI/UX and responsiveness** for a better user experience.
 - Deployed to **4 different clients**.
- **Tech Stack:** Angular, Chart.js, Node.js, GitLab

Highcourt Video Management System

- **Description:** A **secure video management solution** for Indian high courts to handle **video recordings and live court sessions**.
- **Contributions:**
 - Built **VMS and VC** platforms from scratch.
 - Developed **VMS in just 9 days** to meet a critical deadline.
 - Implemented **best coding practices**, achieving a **Lighthouse performance score of 98%**.
- **Tech Stack:** Angular, React, GitLab, LESS, Custom RTSP Streaming

OTT Platform

- **Description:** A **Netflix-like media streaming service** provided by clients to their subscribers.
- **Contributions:**
 - Developed OTT: Admin & **OTT: Subscriber** portals.
 - Implemented **correct caching mechanisms**, improving OTT: Subscriber efficiency.
 - Added an **online vetting feature** for content moderation in OTT: Admin.
- **Tech Stack:** Angular, SCSS, GitLab, Video.js

Indian Airforce Video Management System

- **Description:** A **confidential video management solution** for the Indian Airforce
- **Contributions:**
 - Optimized **Vayudrishti**, improving performance by **30%**.
 - Implemented **hardware key security** in Vayudrishti for enhanced access control.
 - Developed new features for **Vayutarang Admin**
 - Ensured **responsive design for Vayutarang Admin and Console**.
- **Tech Stack:** Angular, SCSS, GitLab

Metadata tracker

- **Description:** A metadata management system for handling movie, series, and show metadata from TMDB, Zee5, Hungama, and Sun Network.
- **Contributions:**
 - Built two frontend projects - **Metadata Tracker** and **Metadata Entry Portal** from scratch for two different clients.
- **Impact:** Streamlined the metadata entry process, improving efficiency.
- **Tech Stack:** Angular, React, Chart.js, Node.js, SCSS, GitLab

TECHNICAL SKILLS

Frontend Development	Angular, React, Svelte, Vue, Redux, Zustand, React Query, Axios, SCSS, LESS, Tailwind CSS, Material UI
Backend Development	Node.js, Spring Boot, MongoDB, SQL
Tools & Platforms	GitHub, GitLab, Firebase, CI/CD, Performance Optimization, Micro Frontend Architecture

CERTIFICATION

Angular Full Stack Development Jspiders, BTM	Bengaluru, Karnataka, India Jan 2022 – Aug 2022
MERN Stack development Besant Technologies	Bengaluru, Karnataka, India April 2024 – Aug 2024

EDUCATION

Mtech - PES University <i>Data science and machine learning</i>	Bengaluru, Karnataka, India July 2024 - Present
B.E – GM Institue of Technology	Davangere, Karnataka, India
